Altro offers you a complete shower solution

Altro offers you a complete flooring, walling and ceiling solution for showers, where cleanability, hygiene, waterproof sealing and safety are of the highest importance.

Altro Whiterock PVCu cladding systems, combined with Altro Marine 20 safety flooring, deliver an imperviously 'tanked' solution with integrated drainage and covered wall joints.

The system provides:

- safety underfoot
- high durability
- impervious floor and wall surfaces (grout free)
- Altro Easyclean Technology for ease of floor cleaning
- coved floor to wall joints
- surfaces that contain an integral bacteriostat
- a range of floor and wall colours
- co-ordinating flooring for changing areas

David Lloyd Leisure Centre

6 Good reasons to choose Altro Whiterock

Altro Whiterock semi-rigid hygienic PVCu wall cladding offers many advantages over ceramic tiles:

- lower installed costs
- better impact resistance
- hygienic, impervious jointing
- welded joint for even higher levels of hygiene
- better appearance retention
- improved cleanability
- quicker installation

no.1 in independent field trials

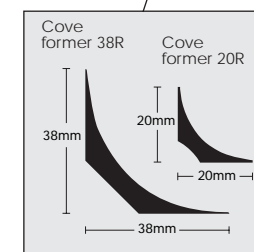

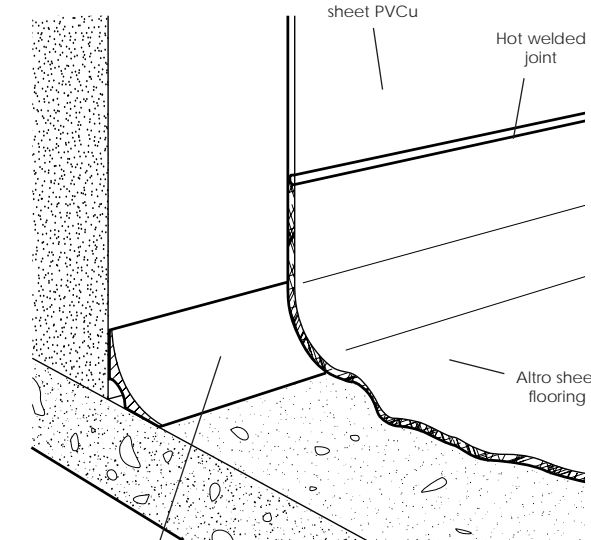

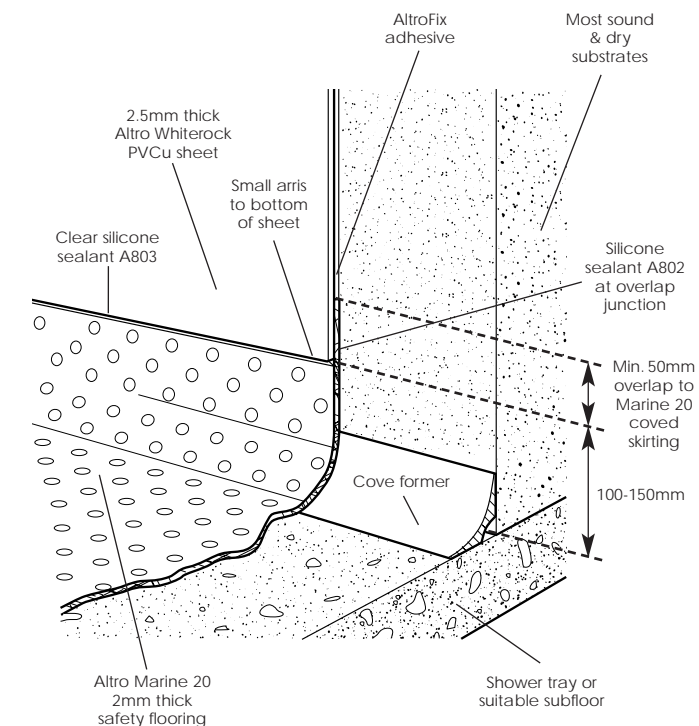

Wales National Indoor Athletics Centre

Wall finishes

A variety of wall finishes may be used in conjunction with Altro Marine 20 safety flooring within showers.

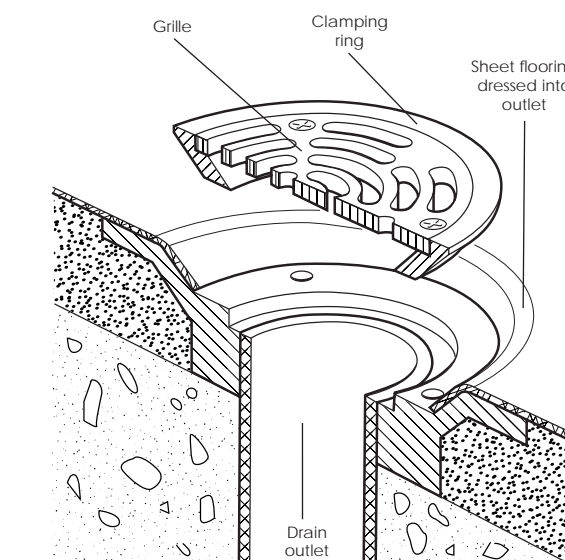

Altro Whiterock PVCu hygienic wall and ceiling cladding

Altro Whiterock PVCu hygienic wall and ceiling cladding is grout-free, is thermoformed around corners and all joints are sealed, creating an impervious, easy to clean finish from floor to ceiling.

AltroSmooth sheet vinyl

AltroSmooth sheet vinyl may also be hot welded to the floor finish to create a waterproof joint. AltroSmooth can be wrapped around corners and coved to the ceiling.

Detailing - drain outlet

A 'clamping' drain outlet can be used, creating a hygienic and waterproof installation.

All our installation detail drawings can be viewed/downloaded from our website www.altro.com within the 'Technical Information' section.
